

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Sally Roscoe  
132 Main St. Apt.411  
Danbury, CT 068107879

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence. We must also encourage the people of Connecticut and the United States to conserve fuel and energy by simple steps taken in their house hold and by using fuel efficient vehicles. The fuel 'shortage' would be greatly reduced by taking this initiative.

Sincerely,  
Caroline and ERik Christensen

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I recently signed up to have my electricity come from wind power. We must develop such alternative sources of energy. The global supply of fossil fuels is finite, determined geological ages ago. in addition, we must consider the environmental impact of our energy policy.

Therefore I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Cyd Gorman  
68 Lanell Dr.  
Stamford, CT 069027831

RE: Docket # CP06-54

I cannot believe that anyone in their right mind would consider putting a 10 story structure in the middle of the sound. It is mind-boggling the environmental and aesthetic compromises that are being considered just for easier access to fossil-based fuels, fuels that will clearly not be the future of America.

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

The Connecticut Sierra Club realizes some people are currently relying on natural gas for heat or hot water. However, we can do more for our wallets and national security by living better and conserving while we transition to a new world. The people of Connecticut (and NY) do not need more foreign fossil fuels along with the price spikes and instability associated with these fuels in today's world.

Therefore, I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

As shown in the recently published paper entitled "Proposed Broadwater LNG Import Terminal" by Synapse Energy Economics of Cambridge, MA, there is no current need for the gas which the terminal proposes to provide. There will be plenty of capacity provided by the 2 terminals being ALREADY built in eastern Canada.

Further, The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Jane Ross  
38 Kings Highway North  
Westport, CT 068803001

Milford, TN 064607115

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquified natural gas facility in Long Island Sound. The risks of this proposal far outweigh any benefits to the people of the State of Connecticut.

The waters of Long Island Sound are vital to Connecticut's economy and ecology. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem. I am deeply concerned about the polluting effects of gas leakage, as well as the destruction caused by the erection of the facility itself.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Francesca Heap

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The Sound is important in many ways to the people who live on its shores, both recreationally and commercially. My husband, three children, and I live in Fairfield and enjoy the beaches here on the LI sound yearround. The Sound is also an estuary of National Significance, where salt water and fresh water are constantly mixing to create a unique environment that supports a variety of wildlife that includes birds, fish, plants and other wildlife. As a fifth grade teacher here in Fairfield, on fall and spring field trips, I enjoy teaching the importance of preserving these vital estuary habitats to my students.

As a parent of three children under five, as well as a teacher, I am very concerned about the environmental impacts this proposed LNG facility would have. Already our area is ranked as one of the worst for air quality. This Broadwater facility will increase the emission of carbon dioxide (CO2), the primary cause of global warming, into the atmosphere. The processes necessary to convert and transport LNG

energy are intensive. The facility will be burning natural gas to power itself and natural gas will be burned to re-gasify the LNG to its gaseous state. This will have an impact on the area's compliance with federal air quality standards.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Last, but certainly not least, this facility provides a significant target for terrorists. The direct effects of an explosive attack on the people of Connecticut and New York are too numerous to list, but not beyond imagination. It would be a grave mistake to support the building of this facility. A LIQUIFIED NATURAL GAS FACILITY DOES NOT BELONG IN LONG ISLAND SOUND.

I am one of thousands who are counting on you to oppose the building of this facility.

Thank you for your time and attention.

Sincerely,  
Aimee O'Brien

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Jerry Weiss  
30 South Wig Hill  
Chester, CT 064121125

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The beautiful waters of Long Island Sound are a precious and vital part of Connecticut. This facility would industrialize one of our most

precious natural resources and have detrimental effects on the Sound's ecosystem which is already stressed by other factors.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence. Please don't underestimate the American public's ability to conserve and to consider other, cleaner sources of energy. All we need is leadership.

Thank you for your time.

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Sean Morris  
18 Elder St.  
Milford, CT 064606469

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Jill Merola  
29 Dock Road  
Chester, CT 064121210

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Now if you were to propose a wave generator in the eastern straits of Long Island Sound or a wind generator farm in the Sound, I might be more in favor.

Sincerely, Tek Nickerson  
Tek Nickerson  
114 Cat Rock Rd.  
Cos Cob,, CT 068071302

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to reject Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

Long Island Sound, with its fisheries and recreational activities is a poor choice for a major industrial development. LNG terminals can't coexist with other activities for security reasons- do we want a large security buffer in the middle of the Sound?

Additionally, we do not need this facility to serve our energy needs. Other LNG terminals are proposed along the northeast. Not all of them are necessary. Additionally, conservation is the best and most cost-effective answer to rising gas prices. We need to invest in energy efficiency first.

Sincerely,  
Roger Smith  
65 Highland St  
West Hartford, CT 061191324

RE: Docket # CP06-54

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Not only should your agency reject this proposal as unneeded, your agency needs to be more effective at advocating for energy efficiency with Congress. It makes no sense in my opinion to only focus on increasing supply without addressing demand.

Sincerely,  
Jonathan Snyder, Esq.  
5 Milo Drive  
Madison, CT 064431909

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence. To put a liquified natural gas facility in Long Island Sound, an estuary, endangers the enviroment of this important body of water and could be a target of terrorism.

Sincerely,  
Dorothy Blaustein  
261 Random Rd  
Fairfield, CT 068251407

Suffield, CT 060782376

RE: Docket # CP06-54

Dear Secretary Salas,

I hope that you will listen to the public and decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

There are no positive reasons to build Broadwater's proposed facility. We have come far enough along that we must protect the waters of Long Island Sound. The waters are a vital part of Connecticut, and it needs to be protected from any possible assault. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

Besides all the possible negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. Instead of allowing Broadwater to build their proposed natural gas facility, the exploration of clean, safe, and renewable energy should be paramount. We should be subsidizing alternatives to fossil fuel, not destroying our waters and land.

Respectfully,  
Ilene Coman

Building up an energy infrastructure to increase use of a dwindling foreign fuel (natural gas) is a poor choice to replace an other dwindling foreign fuel (oil).

How about we pursue the sensible course of efficiency, conservation, and most important, clean & sustainable energy? We'll have to do this sooner or later. My vote is for sooner.

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Carole Golitko  
26 Jenna Rd  
Wallingford, CT 064922939

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

What has happened to our values?! The Sound feeds our souls. It is a gift to all our senses. It is our entertainment and contributes to our health and spirit.

There are alternatives to the proposed LNG facility. They may not be popular either but are palatable, which the LNG plant is NOT.

Thank you.

Sincerely,  
Mary Lee Duff  
4 Faulkner Drive  
Guilford, CT 064373510

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut, New York and Long Island. It is already a very busy waterway and I fear that this facility will further add to the industrialization of this precious natural resource and could have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. I'm asking that the FERC oppose this facility and explore other options that promote cleaner and safer alternatives that won't further endanger the Sound. Thank you for your consideration. Sincerely,

Debra Williams  
300 Day Hill Rd  
Windsor, CT 060951783

RE: Docket # CP06-54

Dear Secretary Magalie Salas,

Please say no to Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

Think of all the people and fish who need a clean, healthy Sound.

Can anyone guarantee 100% that there will never be a leak at--or on the way to or from--a LNG facility? No. Such facilities should not be built where they can damage vital resources.

Besides, the Sound should not be industrialized.

President Bush wants to encourage clean, safe energy. Let's do it. No to the proposal, please.

Sincerely,  
Mary Pasti  
29 Philip St.  
New Haven, CT 065152819

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

Being a bird watcher, one of the things I like about Connecticut is it's accessibility to the Sound and interior areas for birding. Yesterday I spent 4 hours birding along the shore and saw a variety of ducks and hawks. Any type of spill would have a detrimental effect on wildlife, both to invertebrates and fish living in the Sound and other plants and animals dependent upon it. Now I'm able to look across the Sound to Long Island and look for seabirds as Gannets.

The Sound is heavily used for boating; safety issues with increased tanker traffic is of great concern. A 10-story facility would obstruct views everywhere in the Sound. The Sound belongs to all peoples in the surrounding states not an industrial facility.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Nancy Rosenbaum

Dear Secretary Magalie Salas,

I am writing to ask you to decline Broadwater Energy's proposal to build a liquefied natural gas facility in Long Island Sound, docket # CP06-54.

The waters of Long Island Sound are a vital part of Connecticut. This facility would industrialize one of our most precious natural resources and have detrimental effects on the Sound's ecosystem.

In addition to the negative environmental impacts, this facility is not necessary to meet Connecticut's energy needs. We must fully explore the potential of clean alternatives like energy efficiency rather than continuing down the path of fossil fuel dependence.

Sincerely,  
Tim Goodell  
26 Ellery Lane  
Westport, CT 068805202
